TREND Q 607

Trend USA Ltd certifies that the information concerning material content of the **TREND Q** color **607** represented in this document is factually correct and current. All the data was collected analyzing not only the raw materials, as they are prepared at the time of the recipe, but also during the production process.

Estimates for resin and material loss are provided where recent data is unavailable. These estimates are based on practical experience and past measurements and are very close to actual values. The following chart represents the changes that occur to raw materials during the various phase of our production. We have not included in the calculation of the weight the fiber mesh we use as a precaution, since its weight is not so relevant.

The quantity specified below is for a slab of 43.08 sqf., as it comes out of our production. These are the various steps and measurements, in bold, those materials that are affected by these manufacturing steps: recipe and kiln cycle, calibration and finally polishing.

TREND Q COLOR	MATERIAL	QUANTITY	UM	%	RESIN EVAPORATION	LIMESTONE CALIBRATION	RESIN LOSS IN CALIBRATION	MATERIAL REMOVED AT POLISHING	% MATERIAL REMOVED	% FINAL QUANTITY

Based on this analysis we certify that the recycled content of **TREND Q** color **607** is **65.31%**.

RECYCLED MATERIALS

The glass mosaic used for this color comes from our own production of Glass. It has to be considered as pre-consumer recycled.

LOCATION OF EXTRACTION (AS CROW FLIES)

The Collection site for our Recycled glass mosaic is **8512.78 miles** from Trend's manufacturing plant.

Fine quartzite or Silicosil is mined and processed **858.73 miles** away from Trend's manufacturing plant.

Resin is produced and shipped from a plant located **50.66 miles** from our production site.

Limestone used to calibrate the material and as backing is shipped to Trend from a supplier located approximately **500 miles** from our Sebring factory.

Trend considers the environmental and ethical credentials of its suppliers. Information about our suppliers is confidential and can be provided once a confidentiality agreement is signed.

Trend Q can help fulfill Credits "Materials & Resources" and "Indoor Environmental Quality" under the *LEED Rating System.

The *LEED® (Leadership in Energy and Environmental Design) Green Building Rating System is the nationally accepted benchmark for the design, construction, and operation of high performance green buildings.
